Inhalation : Move to fresh air. If breathing is irregular or stopped,

administer artificial respiration. Use oxygen as required, provided a qualified operator is present. Call a physician. Do

not give drugs from adrenaline-ephedrine group.

Skin contact : After contact with skin, wash immediately with plenty of water.

If there is evidence of frostbite, bathe (do not rub) with

lukewarm (not hot) water. If water is not available, cover with a clean, soft cloth or similar covering. If symptoms persist, call a

physician.

Eye contact : Rinse immediately with plenty of water, also under the eyelids,

for at least 15 minutes. In case of frostbite water should be lukewarm, not hot. If symptoms persist, call a physician.

Ingestion : Unlikely route of exposure. As this product is a gas, refer to the

inhalation section. Do not induce vomiting without medical

advice. Call a physician immediately.

#### **SECTION 5. FIREFIGHTING MEASURES**

Suitable extinguishing media : The product is not flammable.

**ASHRAE 34** 

Use water spray, alcohol-resistant foam, dry chemical or

carbon dioxide.

Use extinguishing measures that are appropriate to local

circumstances and the surrounding environment.

Specific hazards during

firefighting

: Contents under pressure.

This product is not flammable at ambient temperatures and

atmospheric pressure.

However, this material can ignite when mixed with air under

pressure and exposed to strong ignition sources.

Container may rupture on heating.

Cool closed containers exposed to fire with water spray.

Do not allow run-off from fire fighting to enter drains or water

courses.

Vapours are heavier than air and can cause suffocation by

reducing oxygen available for breathing.

In case of fire hazardous decomposition products may be

produced such as:

Gaseous hydrogen chloride (HCI).

Hydrogen fluoride

for firefighters

: In the event of fire and/or explosion do not breathe fumes. Wear full protective clothing and self-contained breathing

apparatus.

No unprotected exposed skin areas.

#### **SECTION 6. ACCIDENTAL RELEASE MEASURES**

Personal precautions : Immediately evacuate personnel to safe areas.

Keep people away from and upwind of spill/leak.

Wear personal protective equipment. Unprotected persons

must be kept away.

Remove all sources of ignition.

Avoid skin contact with leaking liquid (danger of frostbite).

Ventilate the area.

After release, disperses into the air.

Vapours are heavier than air and can cause suffocation by

reducing oxygen available for breathing. Avoid accumulation of vapours in low areas.

Unprotected personnel should not return until air has been

tested and determined safe.

Ensure that the oxygen content is >= 19.5%.

Environmental precautions : Prevent further leakage or spillage if safe to do so.

The product evapourates readily.

Methods for cleaning up : Ventilate the area.

Follow all standard safety precautions for handling and use of

compressed gas cylinders. Use authorized cylinders only.

Protect cylinders from physical damage.

Do not puncture or drop cylinders, expose them to open flame

or excessive heat.

Do not pierce or burn, even after use. Do not spray on a naked

flame or any incandescent material.

Do not remove screw cap until immediately ready for use.

Always replace cap after use.

Advice on protection against fire and explosion The product is not flammable.

Can form a combustible mixture with air at pressures above

atmospheric pressure.

Fire or intense heat may cause violent rupture of packages.

#### **Storage**
